Practice quiz: Supervised vs unsupervised learning

Latest Submission Grade 100%

1. Which are the two common types of supervised learning? (Choose two)

1 / 1 point

☒ Classification

✔ **Correct**

Classification predicts from among a limited set of categories (also called classes). These could be a limited set of numbers or labels such as "cat" or "dog".

☐ Clustering

☒ Regression

✔ **Correct**

Regression predicts a number among potentially infinitely possible numbers.

2.

1 / 1 point

Which of these is a type of unsupervised learning?

☒ Clustering

☐ Classification

☐ Regression

✔ **Correct**

Clustering groups data into groups or clusters based on how similar each item (such as a hospital patient or shopping customer) are to each other.
