Practice quiz: TensorFlow implementation

Latest Submission Grade 100%

1.	For the the following code:	1/1 point
	model = Sequential([
	Dense(units=25, activation="sigmoid"),	
	Dense(units=15, activation="sigmoid"),	
	Dense(units=10, activation="sigmoid"),	
	Dense(units=1, activation="sigmoid")])	
	This code will define a neural network with how many layers?	
	4	
	O 3	
	O 25	
	O 5	
	Correct Yes! Fach call to the "Dense" function defines a layer of the neural network.	

How do you define the second layer of a neural network that has 4 neurons and a sigmoid activation?

- O Dense(layer=2, units=4, activation = 'sigmoid')
- Dense(units=4, activation='sigmoid')
- O Dense(units=[4], activation=['sigmoid'])
- O Dense(units=4)
- ✓ Correct

Yes! This will have 4 neurons and a sigmoid activation.

3. 1/1 point

x = np.array([[200.0, 17.0]])

x = np.array([[200.0],[17.0]])

x = np.array([[200.0 + 17.0]])

✓ Correct

Yes! A row contains all the features of a training example. Each column is a feature.
